Mining Hearing Loss Prevention Workshop

*Learn how engineering control development
can help prevent noise-induced hearing loss*

September 26, 2006

Salt Lake City, Utah

Topics:

- Noise Induced Hearing Loss, Principles of Engineering Control Development and Application and Design of Engineering Controls in the Workplace
- Interactive demonstrations and analysis of real-world engineering control development scenarios

Presenters:

NIOSH researchers, MSHA officials, UMWA representatives and manufacturer associates

Target Audience:

Safety Personnel/Management, Maintenance Personnel, Mine Managers/supervisors, Bargaining Unit Representatives

Location:

Salt Lake City Marriott Downtown
75 South West Temple, Salt Lake City, UT 84101
Phone: 801-532-4127
